

CORPORATE BROCHURE

About InterNexus

We put our customers at the center of our existence as an organization. We commit to our customers' aspirations as though they were ours by delivering everything we do with the utmost quality. This is the value system that binds our team, our partners, and our ecosystem to collaborate, drive, and takes ownership of our projects and services.

At InterNexus, our mindset is to create environments where new technologies are drivers for growth and progress, instead of obstacles to our customers' goals.

Our rich industry experience, thriving ecosystem, process-oriented working and customer focus are the ethos that inspires us to push our limits and go the extra mile for our customers. We specialize in the development and deployment of scalable IT solutions that maximize your investment and align to your business goals.

Who we are

InterNexus is composed of seasoned professionals in the realm of physical security, network solutions, enterprise network solutions, and network security.

What we do

We offer full suite of IT solutions that brings you the most advanced systems thinking, attention to detail, passion for excellence, and the vast wellspring of our collective expertise to create innovative, actionable answers that help achieve your business goals.

How we do

We build relationships with our customers by understanding their organizational needs, targets, and goals, then work with them to find the right solutions to build, maintain, manage, or improve their security, network, and technology infrastructure

What makes us different from the rest?

Constant, clear communication

We work with you to fully understand your objectives, requirements, and challenges. Our communication extends throughout the contract to ensure that our services are appropriate for your changing business ecosystem.

Systemic, well-thought out strategy

We formulate a long-term solution road map to ensure that your business is at its peak performance levels and that the IT direction supports organizational goals.

Keeping IT simple

New solutions can be daunting and complex; we make the jargon relevant, understandable, and above all, actionable for your business.

Giving our customers the utmost of our support

Our customers are our be-all and end-all for existing. That's why we take pride in our efforts to provide the highest-quality customer service we can possibly give them. We are your partner every step of the way.

Our Solutions

We at InterNexus offer full suite of solutions that brings you the most advanced systems thinking, attention to detail, passion for excellence, and the vast wellspring of our collective expertise to create innovative, actionable answers that help achieve your business goals.

Enterprise Networking Solutions

Leverage Enterprise Network Solutions to Maximize Performance and Achieve Business Goals

Technology is the primary driver of today's businesses - and there's a myriad of technologies at your disposal to achieve your organization's business goals. Our Enterprise Network Solutions help businesses improve efficiency, growth, and productivity, as well as gives them a competitive edge.

It doesn't matter if you adopt technology to improve customer service, increase productivity, or drive growth - your success in integrating technology into your operations is the difference between a successful bottom line and one that isn't.

We at InterNexus deliver advanced solutions for any enterprise networking requirement. We help you with anything related to getting the right technology to drive your business. We are passionate about leveraging the latest technology in refining business processes with impeccable precision.

Either it's from the smallest to largest deployments here are just some of our fields of expertise in the realm of our Enterprise Network Solutions:

- Routing and Switching
- Wireless solutions

- Data center solutions
 - Data center switching
 - Unified computing

- WAN Solutions
 - WAN Optimization
 - Load balancers

- Collaboration solutions
 - Unified communications
 - Video conferencing

Network Security Solutions

Is Your Network Security Up to Speed With Today's Evolving Threats?

The integrity of your network is only as good as the perimeter that defends it. That's why InterNexus provides full-suite managed network security services to ensure that your entire network is fully protected from today's rapidly-evolving malware, including ransomware, viruses, spam, and potential hackers.

The slightest data breach comprising your - and more importantly, your customers' data - can have far-ranging consequences to your business. We can monitor your network remotely, which gives us advanced information on potential security threats and address them before they breach your perimeter defenses.

InterNexus can monitor your network remotely, which gives us advanced information on potential security threats and address them before they breach your perimeter defenses. Our network security solutions and benefits include the following:

Perimeter level security - nip threats in the bud from the safety of your perimeter defenses

End point security - secure every device on your corporate network by blocking unauthorized access at these entry points

Security Audit - a detailed analytical snapshot of your network's health and security profile.

Virtual Private Networks - safely access your networks from a private, remote area.

Proactive Support - have no worries about your network security because we nip threats in the bud before they become major problems.

Data center security - safeguard your virtualized data center and stabilize your cloud assets

Application and mobility - get the right software and mobility solutions so your workforce is empowered to be productive anywhere they might need to work.

Physical Safety and Security

Is Your Physical Security At Risk?

Many organizations have set themselves up for failure because their physical security systems are underperforming. Maximize and protect your resources, equipment, and facilities with physical security protocols and management built for your organization by working with our seasoned professionals to secure your entrances, exits, and visitors with the right access control solution for your organization.

Our physical security services and solutions are tailor-made to secure your physical, technology, resource, and network infrastructure as well as key data assets to optimize manpower, minimize costs, increase safety standards, and improve situational awareness.

Our solutions are tailored to your unique requirements, and they include:

- Fire Alarm Systems.
- PA Systems.
- CCTV Systems
- Access Control Systems
- Infrared Digital Thermometers
- Thermal Scanners
- Dynamic Face and Fingerprint Recognition with Temperature Measurement Systems

Connectivity Solution Solutions

Is Your Network Infrastructure Agile Enough to Support 24/7 Connectivity?

InterNexus combines decades of industry expertise with the best resources, tools, people, and processes so that your business can achieve optimal performance levels by supplying it with a bespoke connectivity solution that features high-speed internet access and optimal network connectivity.

We make sure that you get maximum, secure connectivity from your technology and information assets by providing cost-effective, scalable connectivity solutions that are tailored to your organization's needs - so you can extend your reach, get more value, and tap into new markets.

Our connectivity solutions include:

• Internet leased line

- MPLS VPN
- PRI
- SIP

• Work from home solutions

- Secure Remote Access
- Hosted IVR
- Web conferencing

Electric Scooters

Help Reduce Your Environmental Footprint

Electric scooters are becoming more and more mainstream by the day. It is now more cost-effective to own an electric scooter than it has ever been at any point in time, and there is a myriad of benefits why people are switching to electric scooters. Electric scooters offer more value and are undoubtedly a cheaper, more ecologically-friendly and efficient way to get from one place to another.

Less emissions means a lower carbon footprint, thanks to the reduced impact of greenhouse gases. It's one step closer to shifting our dependence on traditional fuels towards renewable and sustainable electrical power sources.

The future looks promising for electric scooters based on the benefits that they bring to the table such as:

- Fast charging anytime, anywhere
- A more portable, quiet and enjoyable form of transportation
- Save money

Our partnership with MotionMan Scooters

MotionMan Scooters is a 100% Indian electric two-wheeler manufacturing company that was established in 2018 with a vision to create electric two wheelers that can compete with the world's best brands. They are located in Faridabad, India

Innovation driven by strategic, industry-relevant partnerships

We have partnered with the world's leading companies for our physical security solutions offerings. These include Ravel, Tata, GST, Bosch, Honeywell, Commscope, Belden, Rittal, R&M, Molex, Cisco, Sophos, Checkpoint, Fortinet, and Motionman Scooters. That's why we are confident of providing our customers a world-class result and cost-effectiveness.
